

**SERMON NOTES**

**Safety Tips**

**Flu Season Tips-Vinegar Kills Flu Viruses**

1. Flu viruses circulate less freely in humid environments and often an epidemic will follow a drop in humidity. Consider using a humidifier in your home.
2. Cover your food and drinks when dining in public places.
3. When disinfecting surfaces use a spray disinfectant in place of disinfectant wipes which are prone to relocating bacteria from one spot to another.
4. Open your windows for 20-30 minutes daily to remove stale air from your home and bring in fresh outside air.
5. Flu viruses cannot live in high temperatures. Use your dishwasher's highest heat cycle along with some vinegar to disinfect children's toys and pacifiers.
6. Use your clothes dryer's highest setting for 30 minutes to disinfect throw pillows, little blankets, winter coats, and children's stuffed animals.
